Document Title: API Test Syllabus Overview

Uploaded By: Prof. FAC_AIML_01 (Verified)	**Course Unit:** Unit 1: Mathematical Foundations
File Name: syllabus_overview.pdf	**Upload Timestamp:** 2026-10-29
Source Repository: Fluxbase PostgreSQL • learning_materials	**Status:** Indexed in ChromaDB Vector Store

1. Primary Teaching Points & Lecture Excerpt

“Unit 1 multivariable calculus and matrix operations foundations.”

2. Mathematical Formulation & Slide Notes

```
dL / dw_jk = (dL / dy_k) * sigma'(z_k) * a_j = delta_k * a_j
delta_j = (sum delta_k * w_jk) * sigma'(z_j)
```

3. Instructor Revision Recommendation

Students must thoroughly master the multivariable chain rule decomposition before attempting backpropagation matrix updates in Assignment 2 and SEE exams. Consult teacher counseling notes for remedial exercises.
